Vanguard ESG Developed World All Cap Equity Index Fund (UK) (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00BLLZQL34

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Developed All Cap Choice Index (the "Index").
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund promotes environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment. This is met by tracking the Index.
- The Index is a market-capitalisation weighted index representing the performance of large, mid and small-size shares covering developed markets around the world. Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company. The Index is constructed from the FTSE Developed All Cap Index which is screened for certain environmental, social, and corporate governance (referred to as "ESG") criteria by the sponsor of the Index, which is independent of Vanguard.
- The Fund attempts to:
 - Track the performance of the Index by investing in all component shares of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 - Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Index excludes shares of companies that the sponsor of the Index determines to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, the following activities: Vice products, Non-renewable energy and Weapons. It also excludes companies that, as determined by the Index provider, are involved in severe controversies (i.e., companies which do not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles).
- Where the Index provider has insufficient or no data available to adequately assess a particular company relative to the ESG criteria of the Index, such companies may be excluded from the Index until such time as they may be determined to be eligible by the Index provider.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio

management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index. Derivatives on an index (e.g. swaps, futures) may contain some underlying constituents which may not meet the ESG criteria.

- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The currency of the share class is GBP.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected

to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

- Sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Accuracy risk. There is no assurance that the Index provider will compile the Index accurately or that the Index will be determined, composed or calculated correctly.
- Environmental, Social and Governance risk. A Fund may track an index which screens out possible investments if they do not meet certain environmental, social and governance ("ESG") criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Benchmark Index in order for example, to correct an error in the selection of index constituents.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.
