Vanguard Global Sustainable Equity Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Income

ISIN: GB00BMV9B514

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to provide an increase in the value of investments over the long-term (more than 5 years), through a combination of capital growth and income. The Fund aims to achieve this whilst selecting investments which meet certain sustainability criteria.
- The Fund is an active fund whereby the Manager uses its expertise to pick investments to achieve the Fund's objectives. The Fund uses an independent sub-investment adviser (the "Manager") which follows a distinct approach in managing the Fund's investments.
- The Fund seeks to achieve its investment objective by investing almost exclusively (at least 90% of the Fund's assets), in shares issued by large and mid-size companies located throughout the world, selected in accordance with the Sustainability Policy below.
- The Fund has the ability to invest in a wide range of countries, currencies, sectors and industries. Turnover of individual holdings within the Fund is expected to be low but can vary based on the Manager's views.
- The Fund may invest up to 100% of its Net Asset Value in developed countries and up to 20% of its Net Asset Value in countries which are considered by the Manager to be emerging markets. Emerging markets are countries that are progressing towards becoming advanced.
- The Fund may also have exposure to other collective investment schemes (which themselves invest in securities which are consistent with the Fund's objective and the Sustainability Policy), depositary receipts, convertible securities, investments in real estate investment trusts, money market instruments and deposits, and warrants. Money market instruments are investments usually issued by banks or governments that are a short term loan to the issuer by the buyer. Warrants provide the holder with the right, but not the obligation, to purchase a share at a fixed price or amount at a fixed time in the future.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- Sustainability Policy: The Manager excludes investments that fall within an exclusions policy (which excludes companies involved in and/or deriving revenue (above certain thresholds) from tobacco, thermal coal, oil sands, nuclear / controversial weapons), and then considers each company's alignment to the Fund's stewardship assessment, net zero and carbon footprint targets.
- The FTSE All-World Index (the "Index") serves as a reference benchmark for both performance comparison and weighted average carbon intensity comparison. Whilst the Fund may hold investments that are components of the Index, the Index is not considered during portfolio construction and the Manager will not manage the extent to which the Fund's investments differ from the Index.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be paid out.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which shares in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-Investments-Funds-ICVC.pdf>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging is not guaranteed to completely eliminate currency risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Sustainability risk. The Fund may not make possible investments if they do not meet the Fund's Sustainability Policy. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers

to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the Prospectus on our website at https://global.vanguard.com

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
